

○次の計算をせよ。

1.  $(x + 2)(x + 1) =$

[  $x^2 + 3x + 2$  ]

2.  $(x + 4)(x + 2) =$

[  $x^2 + 6x + 8$  ]

3.  $(x + 5)(x - 1) =$

[  $x^2 + 4x - 5$  ]

4.  $(x + 9)(x - 4) =$

[  $x^2 + 5x - 36$  ]

5.  $(x + 5)(x - 8) =$

[  $x^2 - 3x - 40$  ]

6.  $(x - 4)(x + 3) =$

[  $x^2 - x - 12$  ]

7.  $(x - 7)(x + 5) =$

[  $x^2 - 2x - 35$  ]

8.  $(x - 6)(x + 8) =$

[  $x^2 + 2x - 48$  ]

9.  $(x - 4)(x - 8) =$

[  $x^2 - 12x + 32$  ]

10.  $(x - 2)(x - 7) =$

[  $x^2 - 9x + 14$  ]
